

Test Summary Report - SauceCart Project

Source : <https://www.saucedemo.com/>

Modul	Total TC	Passed	Not Passed	Status
Authentication (Login)	11	10	1	1 Not Passed
Product & Catalog	12	12	0	Completed
Cart	6	6	0	Completed
Checkout	6	6	0	Completed
TOTAL	35	34	1	97.14% Passed

Bug ID	Title	Severity	Priority	Status
BUG-001	Login button is still enabled when both fields are blank	Medium	P2	Open
BUG-002	Login blocked for locked_out_user (documented for regression)	Medium	P1	Passed
BUG-003	Cart contains 3 items by default (user: error_user)	Medium	P2	Open
BUG-004	Broken layout & visuals when logged in as visual_user	Low	P3	Open

Defect Trend Insight

- All bugs are in the Login/Authentication module
- Product, Cart, and Checkout modules do not produce active bugs
- 1 out of 35 test cases did not meet expectations (TC_LOG_006)

Conclusion

1. The system is running stably in the main modules (products, cart, checkout).
2. The login module requires minor improvements and session handling checks.
3. Three bugs with the "Open" status need to be fixed:
 - Login button validation when the field is empty.
 - Default cart data for **error_user**.
 - Broken UI for **visual_user**.

Recommendations

1. Perform regression testing after the bug is fixed.
2. Perform additional validation on specific users (simulations: problem_user, error_user, etc.)
