Bug ID	Title	Test Case ID	Module	Severity	Priority	Environment	Steps to Reproduce	Expected Results	Actual Results	Status	Notes
BUG-001	Login button is still enabled when both fields are blank	TC_LOG_006	Authentication – Login	Medium	P2	Google Chrome, macOS 14.5	1. Open login page: https://www.saucedemo.com/ 2. Leave both Username and Password fields blank 3. Click Login	1. Login button should be disabled when fields are empty 2. No form submission should be allowed	1. Login button is **enabled** 2. Clicking triggers partial validation (only username is flagged)	**Not Passed**	User gets feedback only on the username field, indicating that password field isn't being validated properly. *Functional bug (UI logic does not match expectations)
BUG-002	Login blocked for locked user account (locked_out_us er)	TC_LOG_007	Authentication – Login	Medium	P1	Google Chrome, macOS 14.5	1. Open login page 2. Enter Username: **locked_out_user** 3. Enter Password: **secret_sauce** 4. Click Login	1. Login should fail 2. Error message appears: "Epic sadface: Sorry, this user has been locked out."	Login is blocked and error appears as expected	**Passed**	This test is marked as passed, but still logged as a bug to document locked account behavior for regression tests. *Expected behavior, but still documented as a regression reference or product discussion.
BUG-003	Cart contains 3 items upon login using error_user, even before adding any products	TC_LOG_010	Authentication – Login	Medium	P2	Google Chrome, macOS 14.5	1. Open https://www.saucedemo.com 2. Login using: Username: **error_user** Password: **secret_sauce** 3. Observe the cart icon on the top right	Cart should be empty upon login if no products were added previously	Cart icon shows 3 items, even though user has not interacted with any products	**Passed**	- Status Passed, but behavior is incorrect. - This is a functional bug, indicating inconsistent cart state at login. - May relate to prefilled session or UI simulation for error_user - Recommend further investigation for session/cart persistence behavior for this user profile
BUG-004	Layout inconsistency and broken product visuals when logged in as **visual_user**	TC_LOG_011	Authentication – Login	Low	P3	Google Chrome, macOS 14.5	1. Open https://www.saucedemo.com 2. Login using: Username: **visual_user** Password: **secret_sauce** 3. Observe product images, descriptions, layout, and icons on the product page	- All product images load properly - Layout, icon positions, and fonts display consistently - No overlapping or broken UI components	- Some product images are missing or distorted - Descriptions appear misaligned or incomplete - Layout components overlap (e.g. buttons, price, icons)	**Passed**	- Status Passed (login works), but UI is visually broken - Visual bugs impact user experience and perceived professionalism - Might simulate real-world rendering issues for stress testing or A/B design - Suggested to tag as UI Bug, and log for frontend/design QA
